Caisse d'Epargne Standardizes on ETI Solution[®] for Enterprise Data Integration *ETI Software Powers Bank's Integration Competency Center*

AUSTIN, Texas — March 20, 2008 — ETI (Evolutionary Technologies International, Inc.), a global provider of high performance data integration solutions, today announces that Groupe Caisse d'Epargne, a Global 500 company and one of the largest savings banks in France, has consolidated the use of ETI Solution data integration platform to standardize data integration throughout the company and improve operational efficiency around its 4,700 branch operations country-wide.

The bank will use ETI Solution software to speed implementation of its enterprise data integration processes and plans to improve data quality and accuracy by increasing its installations of ETI Solution as the basis for an Integration Competency Center (ICC) based near Lille. The bank will use the unique architecture of ETI Solution for centralized control and distributed development.

By integrating company-wide data currently stored in mainframe and open systems, the new system will upgrade and deploy new processes to generate key decision support information for the bank's business management, risk management and fraud prevention systems.

The ICC will speed deployment and reduce costs of strategic integration projects by implementing consistent best practices and standards across multiple initiatives and reusing processes to optimize internal IT services.

Ron Baker, ETI CEO, underscored a crucial point: "ETI Solution is designed to meet the needs of groups with multi-site operations requiring a cohesive approach to complex, high performance data integration. The Caisse d'Epargne ICC will be the nerve center that consolidates all data from the different bank locations and the inherent scalability of ETI Solution gives them the confidence that their data integration solution will grow with their IT needs in the years to come."

About Groupe Caisse d'Epargne

Groupe Caisse d'Epargne (GCE), a Global 500 company and one of the largest savings banks in France, offers a comprehensive range of services to all types of customers. With a total of 52,000 employees, GCE is active in all segments of the banking industry and the principal international financial markets. The individual Caisses d'Epargne, the foundations upon which the Group is built, are regional mutual savings banks catering to the full range of customers: individuals, corporations, local authorities, associations and institutional investors. They guarantee complete financial security for their customers and are totally autonomous entities beneath the Group banner. For more information visit
